5. Administration

PROFESSIONALISM CHALLENGES

- Lack of PTs
- Heavy workload
- Cultural/language barriers (for ex. gender and religion)
- Ethical dilemmas
- Px with unrealistic expectations
- Px that are late/ no shows
- Balancing personal emotion/ patient care

MORE TERMS

Tachy - increased/fast

Brady - decreased/slow

Tachycardia

- Fast heart rate

Bradycardia

- Slow heart rate

Tachypnea

- Fast breathing

Bradypnea

- Slow breathing

Pathy - disease

Prefix - beginning (location, time, number)

- **Hypo-**
 - Abnormal decrease in size
- **Hyper-**
 - Abnormal increase in size
- **Hemi-**
 - half
- **Peri-**
 - around

Root - main, combining form

Suffix - end (disease, procedure, condition)

- **-Itis (inflammation)**
 - Body's response to an injury
- **-Ectomy**
 - Surgery/removal
- **-Megaly**
 - enlargement
- **-Plegia**
 - Paralysis (loss of muscle control)
- **-Plasty**
 - Surgical repair/replacement

INTRODUCTION TO PT & MEDICAL TERMINOLOGIES (POST LEC)

Lecture #2, 3, & 4: PT As A Profession, Med Terms | OPHT 1-1 | PRELIMS

By Accel Jimenez

ASSESSMENT AND DOCUMENTATION

- ROM – Range of Motion
- PROM – Passive Range of Motion
- AROM – Active Range of Motion
- AAROM – Active Assisted Range of Motion
- MMT – Manual Muscle Testing
- BP – Blood Pressure
- HR - Heart Rate
- RR – Respiratory Rate
- WBAT – Weight Bearing As Tolerated
- O2 Sat – Oxygen Saturation
- ADLs – Activities of Daily Living
- IADLs – Instrumental Activities of Daily Living
- SOAP – Subjective, Objective, Assessment, Plan (documentation format)
- WNL – Within Normal Limits
- WFL – Within Functional Limits

TREATMENT & INTERVENTIONS

- TherEx – Therapeutic Exercise
- NMRE – Neuromuscular Re-education
- STM – Soft Tissue Mobilization
- NDT – Neuro-Developmental Treatment
- PNF – Proprioceptive Neuromuscular Facilitation
- CPM – Continuous Passive Motion (machine-assisted movement)
- E-stim – Electrical Stimulation
- TENS – Transcutaneous Electrical Nerve Stimulation
- FES – Functional Electrical Stimulation
- US – Ultrasound therapy
- HEP – Home Exercise Program

MOBILITY & ASSISTIVE DEVICES

- AD – Assistive Device
- LBQC – Large Base Quad Cane
- SBQC – Small Base Quad Cane
- Loftstrand – Forearm crutches
- WC – Wheelchair
- TTWB – Toe-Touch Weight Bearing
- PWB - Partial Weight Bearing
- WBAT - Weight Bearing As Tolerated
- NWB – Non-Weight Bearing
- LBP – Low Back Pain
- OA – Osteoarthritis
- RA – Rheumatoid Arthritis

CONDITIONS & DIAGNOSES

- DJD – Degenerative Joint Disease
- SCI – Spinal Cord Injury
- CVA – Cerebrovascular Accident (Stroke)
- TBI – Traumatic Brain Injury
- MS – Multiple Sclerosis
- PD – Parkinson's Disease
- CP – Cerebral Palsy
- ALS – Amyotrophic Lateral Sclerosis
- MD – Muscular Dystrophy
- RTC – Rotator Cuff Tear
- ACL – Anterior Cruciate Ligament
- PCL – Posterior Cruciate Ligament
- MCL – Medial Collateral Ligament
- LCL – Lateral Collateral Ligament
- HOB – Head of Bed
- BKA – Below Knee Amputation
- AKA – Above Knee Amputation
- CPM – Continuous Passive Motion
- SBA – Stand-By Assist
- CGA – Contact Guard Assist
- Mod A – Moderate Assistance
- Max A – Maximal Assistance
- PRN – As Needed
- BID – Twice Daily
- TID – Three Times Daily
- QID - Four times daily
